Remember:

1. Inside the input tag the default value of inputs are 20 characters.
   Notes on GET:
   - Appends the form data to the URL, in name/value pairs
   - NEVER use GET to send sensitive data! (the submitted form data is visible in the URL!)
   - The length of a URL is limited (2048 characters)
   - Useful for form submissions where a user wants to bookmark the result
   - GET is good for non-secure data, like query strings in Google

   Notes on POST:
   - Appends the form data inside the body of the HTTP request (the submitted form data is not shown in the URL)
   - POST has no size limitations, and can be used to send large amounts of data.
   - Form submissions with POST cannot be bookmarked

Tip: Always use POST if the form data contains sesitive or personal information

----

2. The auto-complete gives the suggestions to the user while putting the inputs
